

**Connect & Communicate From Anywhere, Anytime**

**Vizada Networks** is an independent, global satellite communications and telecommunications specialist. As a comprehensive systems integrator, one-stop-shop and single point of contact, Vizada Networks controls the entire value chain and serves markets with complete turnkey networks solutions, ranging from broadband access and voice gateways to custom-built communication systems. The company has been delivering its services to telecom carriers and ISPs, multinational companies, government & military bodies, humanitarian & aid organizations and SMEs & SOHOs for over 35 years. Vizada Networks employs 225 people in our offices in Europe and Africa.

**We are located alongside Holmestand's scenic boat harbour just a breath from the open fjord.**

Vizada Networks is now seeking a

# ***Senior Network Engineer – Pre-sales***

## **Description**

Our Engineering-group is responsible for advanced technical designs and is working closely with our sales-department. We work with small to large projects, including creating global WAN solutions for international organizations. The services offered typically include a number of technologies - satellite platforms, terrestrial MPLS networks, advanced routing and security functionality.

## **Areas of responsibility**

- Make technical designs to support the success of future sales-cases
- Create high-quality written input in English for customer proposals
- Act as a platform specialist, and maintain advanced skills with the capability to use the platform in advanced and novel ways.
- Co-operate with technical counterparts at providers and partners

**You have advanced technical skills and experience within some of the following areas:**

- VSAT platforms
  - iDirect, DVB-RCS, TDMA
  - Comtech / Newtec / Advantec
  - BGAN
  - Link budgets
- Switched and routed networks
  - Cisco
  - Juniper
- Terrestrial networks - fiber-networks, leased-lines, frame-relay, MPLS
- Network security
  - Cisco
  - Fortinet
  - Juniper
  - Checkpoint
- WAN acceleration
- Wireless networks, WiFi and WiMAX
- Network Management Systems, monitoring, IP SLA, Netflow

**You have:**

- A technical bachelor or master degree within computer science, communication technology or electronics.
- The ability to analyze and respond to complex customer requirements
- Understand both technical and commercial aspects.
- The capability to be creative and to combine technologies and platforms in new ways.
- Excellent English verbal and written communication skills.
- The ability to perform well under high workload and with multiple simultaneous tasks.
- A flexible attitude combined with structured abilities.

**We offer**

Vizada Networks offers an international, flexible and dynamic working environment. Your colleagues are highly skilled persons which creates big opportunities for personal growth and learning.

The successful applicant will be offered a competitive salary and a beneficial pension system.
